

Your 100% Energy Star Builder

HOME OWNER BENEFITS of buying an Energy Star Qualified Home.

Lower monthly expenses due to energy savings each and every month from day one.

Because your energy costs are lower you may choose to buy a larger home.

Enjoy a more comfortable home due to superior insulation and sealing.

Promotes healthier families with improved interior air quality.

Future expectations of a higher resale value when buyers see this label on your home:

What is “Energy Star”?

“Energy Star” is the government backed symbol for energy efficiency. The “Energy Star” mark identifies your new Braselton Home as a home that includes the energy efficiency, features, quality and performance that consumers expect.

What makes a home “Energy Star”?

To earn the ENERGY STAR, a home must meet guidelines for energy efficiency set by the U.S. Environmental Protection Agency. These homes are at least 15% more energy efficient than homes built to the 2004 International Residential Code (IRC), and include additional energy-saving features that typically make them 20% to 30 % more efficient than standard homes.

Contact a Braselton Homes Sales Professional for more information on the specifics of our program. Also for more information on Energy Star got to the website at www.energystar.gov
